TURNKEY DONOR ADVISED FUND

Whether a mature community foundation DAF program, or a startup at a major university, our platform is a complete turnkey solution.

When combined with the features of our Philanthropic Back Office (PBO), Endowment & Foundation clients have a feature set that is accessible and comparable to those at commercial DAFs.

The GiftingNet platform has a full lifecycle workflow engine for donor advised funds.

PHILANTHROPIC BACK OFFICE

Real-time Financial Processing & Reporting,

The Philanthropic Back Office (PBO) incorporates a set of managed

bi-directional interfaces with fund/trust accounting, general ledgers, CRM, and other financial systems.

ONLINE GRANT ADMINISTRATION

The platform contains a sophisticated, but easy-to-manage competitive grant module, capable of handling single stage or multistage applications, and the ability to facilitate online reviews from committees and staff.

This platform is a robust tool for any grant-making foundation. Community foundation clients can even attain new revenue streams by re-offering the competitive grant-making capabilities of the platform to private foundations.

Using the same workflow engine, the platform offers online scholarship applications and reviews to any organization offering scholarships. This is another revenue source for charitable intermediaries to facilitate the online workflow.

DYNAMIC DASHBOARDS

The GiftingNetwork platform provides customized views of data, tailored to the roles of participants, presented in a logical/efficient format, driven by an intuitive user interface.

These dashboards can be accessed with any web enabled device.

CHARITABLE CATALOG

An illustrated catalog of funding opportunities, organizations and specific projects. The Catalog empowers donors to discover charitable causes and projects at their preferred nonprofit organizations which precisely satisfy their charitable needs and interests.

The Charitable Catalog gives grant seekers an online showcase for their programs. Sponsor charities can automate donor service and charitable guidance by spotlighting priority needs and projects for their donors, and by establishing grant restrictions on external distributions.

MOBILE APPLICATION

The GiftingNetwork platform uses a responsive web design approach. This enables users to access content on any browser on any device whether it's a desktop, laptop, tablet or mobile phone. Content is optimized for the form factor and feature set of the user's device.
